Chassis Preparation Assembly Manuals - coexportsicilia.it

In the 9th hole, create an assembly just as you did in the 11th hole, only this time using a long belt and an 8mm REX shaft with a snap ring. Once you have the parts on the shaft, slide the shaft all of the way through until the snap-ring contacts the inner race of the bearing. Note: This assembly is very

car. Lightly “tap” the chassis and rear pod releasing any tension in the links. Keep the chassis flat on the table for step 4. 4 - Hold the chassis at the hold point “H” by pressing the chassis down to the table. Slowly tighten the 2 locknuts that secure the center pivot assembly. For now, just lightly snug one side, then the other.
