Swimming pool construction - Designing Buildings - Share your construction industry knowledge. A swimming pool is a water retaining structure used for purposes such as leisure and exercise. Pools can be sunk into the ground or built above it, as a freestanding construction or as part of a building or other structure such as a ship.

Swimming pool construction - Designing Buildings

Plumbing: Water services, sanitation facilities, water storage, distribution through piping and taps (WC's, showers etc.) A water supply system can be defined as a network of engineered hydraulic and hydrologic components that guarantee water at the necessary and expected quality, quantity and pressure (Wise and Swaffield, 2012). The main elements of a water supply system include: a ...

Supply and Distribution of Building Services

A humidistat or hygostat is an electronic device analogous to a thermostat but which responds to relative humidity, not temperature. A typical humidistat is usually included with portable humidifiers or dehumidifiers. It can also be included with combined air cleaner or humidifier units to control a home's humidity level or any other indoor space.

Humidistat - Wikipedia

Heating, ventilation, and air conditioning (HVAC) is the use of various technologies to control the temperature, humidity, and purity of the air in an enclosed space. Its goal is to provide thermal comfort and acceptable indoor air quality. HVAC system design is a subdiscipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics, and heat transfer.
