Manual up/down controls for elevator technicians, to be used in inspection mode, for example. An independent service/exclusive mode (also known as "Car Preference"), which will prevent the car from answering to hall calls and only arrive at floors selected via the panel. The door should stay open while parked on a floor. This mode may be used for temporarily transporting goods. Attendant ...

Elevator - Wikipedia

An elevator is a platform, either open or enclosed, used for lifting people or freight to upper floors within a building. Elevators are a standard part of any tall commercial or residential building. In recent years, the introduction of the Federal Americans with Disabilities Act has required that many two-story and three-story buildings be retrofitted with elevators. Manually operated ...

INSTALLATION & OPERATING INSTRUCTION MANUAL - sweetmfg.com

Elevator doors have two major types, manual and automatic. Manual doors are normally opened and closed manually by hand, and automatic doors are the standard type of doors found in modern days elevators, usually powered by a door operator. These doors are normally opened or closed manually using hands, although some of them close automatically. Most older and small European elevators from the ...
