Valuing Environmental and Natural Resources

Alternative Methods of valuation of Environmental Goods and Services: Methods of valuation of environmental goods and services may broadly be classified into two categories: (1) Pecuniary, and (2) non-pecuniary. Pecuniary valuation methods obtain the 'money equivalent' of these goods and services - money is used as the numéraire, while non-pecuniary methods, more general in nature, may use any numéraire for valuation.

Valuation of Environmental Goods and Services

Money valuation of environmental and natural resources strikes some people as improper, or even immoral. But keep in mind, money functions in CBA simply as a common measuring rod; it does not urge greed nor exploitation of resources. We could use some other measuring rod, but thus far, no better ones have emerged.

Valuing Natural Resources

The primary concern of Environmental & Resource Economics is the application of economic theory and methods to environmental issues and problems that require detailed analysis in order to improve management strategies. The contemporary environmental debate is in a constant state of flux, with new or relatively unexplored topics continually ...
