Exercise 1 Topographic Maps Envgeology Home

This exercise will look at how topographic maps are created, what information they contain, how you can use them with a compass to get where you want to go, and how to measure the relative positions of points of interest. Much of the information discussed is applicable to all types of maps, but for the exercises associated with this tutorial ...

EXERCISE 1 TOPOGRAPHIC MAPS - Jane Lackey - Cours

A topographic map is a precise, graphic representation of the three-dimensional shape of the earth's surface.

Topographic maps are used by surveyors, engineers, and geologists, as well as hikers, back packers, and other outdoor recreationalists. A standard topographic map uses contour lines to express elevations above sea level and show the ...

topographic maps are produced at a variety of scales; the choice of which depends on the user. Should the user need detailed topographic information over a relatively small area, then a 1:24,000 scale map would be a good choice. On the other hand, a 1:250,000 scale map would be better for examining regional features that extend over a large area.

Exercise 2 Topographic Map Basics

The USGS was entrusted with the responsibility for mapping the country in 1879 and has been the primary civilian mapping agency of the United States ever since. The best known USGS maps are the 1:24,000-scale topographic maps, also known as 7.5-minute quadrangles. From approximately 1947 to 1992, more than 55,000 7.5-minute
