This is also true for the friezes as well. Many of the friezes for hexaflexagons of large numbers of sides will twist back and around on themselves. An example of this is on the page for the 12 sided Zodiac flexagon model of this website. Sometime I will write up an advanced hexagon creation article to cover these cases and a few other topics.

### The Flexagon Portal - Hexaflexagons

Flexagons present new ways to create beauty with a combination of patterns in numbers and art. Square flexagons have obvious synergy with magic squares. If we create or select magic squares where the sub squares also add up to magic numbers, we can create square flexagons that will be magic on all flexagon faces, even though the faces are rearranged during flexing.

### The Flexagon Portal - Flexagon Magic

There are three different hexahexa- flexagons- one folded from a straight strip, one from a chain bent into a hexagon and one from a form that somewhat re- sembles a three-leaf clover. The decahexaflexagon (10 faces) has 82 different variations, all folded from weirdly bent strips.

### Fantastic Flexagons: Hexaflexagons and Other Flexible ...

In geometry, flexagons are flat models, usually constructed by folding strips of paper, that can be flexed or folded in certain ways to reveal faces besides the two that were originally on the back and front. Flexagons are usually square or rectangular (tetraflexagons) or hexagonal (hexaflexagons). A prefix can be added to the name to indicate the number of faces that the model can display, including the two faces (back and front) that are visible before flexing. For example, a ...
