Java - Programming Languages - YouTube

`java.awt.Graphics.drawLine(int x1, int y1, int x2, int y2)` In this code (x1, y1) is the start point of the line, and (x2, y2) is the end point of the line. So the code to draw a horizontal line is as follows:
`Graphics.drawLine(20, 100, 120, 100);` The demo below accumulates all mentioned techniques. Move the slider to display various weather types.

Lesson: Getting Started with Graphics (The Java™ Tutorials ...)

Java is used in all kind of applications like Mobile Applications (Android is Java based), desktop applications, web applications, client server applications, enterprise applications and many more. When compared with C++, Java codes are generally more maintainable because Java does not allow many things which may lead bad/inefficient programming if used incorrectly.
