Description: The other code for controlling the robot using the Android application, is very similar and works the same way. Here instead of the radio module we need to define the Bluetooth module and initialize its communication in the setup section. So again, first we read the incoming data from the smartphone or the Android app, and according to it, tell the robot in which direction to move.

Arduino Mecanum Wheels Robot - How To Mechatronics

The NRF is expecting a near-record breaking year with consumer spending for Valentine's Day up nearly 10% and reaching \$23.9B. The number of people buying candy is expected to be at a new record high with 56% of consumers planning to buy candy for Valentine's Day. Expected candy sales volume is also up and at \$2.2B would be runner up only to 2020 (\$2.4B). Using sales data from the past 14 ...
