CASS, W.Va. — Buffalo Creek & Gauley Railroad 2-8-0 No. 4, the last steam locomotive in revenue service on the fabled West Virginia short line, will steam again, thanks to a plan to obtain a new boiler for the Consolidation. John Smith, CEO of Cass Scenic Railroad and West Virginia Central Railroad operator Durbin & Greenbrier Valley Railroad, tells Trains News

New boiler will allow Buffalo Creek & Gauley No. 4 to run ...

One is a new sort of steam pump, essentially two devices like de Caus', but attached to a single boiler. A key invention is the addition of cooling around the containers to force the steam to condense. This produces a partial vacuum inside the chambers, which is used to draw a volume of water into the containers through a pipe, thus forming a pump.

Timeline of steam power - Wikipedia

The model is reported to be around 30 percent complete, with all work hours being donated. Both the left and right sides of the frame structure are expected to be symmetrical. Boiler. On January 26, 2018, the T1 Trust announced it had ordered the first and second courses of the massive boiler. The courses are the largest parts of PRR 5550 ordered to date. The first two sections of the boiler ...

Pennsylvania Railroad 5550 - Wikipedia

Stetler had come to know 2816 working as Doyle McCormack's lead man during the rebuild of her boiler, and had been brought up to North Vancouver as CP's newly appointed Manager of Steam Operations to manage the final reassembly of the struggling overhaul. Stetler worked logistical, strategic, and budgetary wonders to not only accomplish the extra work, but to allay fears that the
