SAS Macro Programming Made Easy
SAS Macro Functions There are some SAS macro functions which help you to execute various operations within a macro. They are listed below - 1. %EVAL Function It is used to perform mathematical and logical operation with macro variables. Example - %let x = 10; %let y = 20; %let z = &x * &y; %put &z; It returns "10*20". %let z2 = %eval(&x*&y); %put &z2;

SAS Macros Made Easy - ListenData
SAS Macro Programming Made Easy. This book provides beginners with a thorough foundation in SAS macro programming. The macro facility is a popular part of SAS. Macro programming is a required skill for many SAS programming jobs, and the SAS Advanced Programming Certification Exam tests macro processing concepts.

SAS Macro Programming Made Easy by Michele M. Burlew
The SAS macro language was used to write several macros that are very useful for the analysis of series of n-of-1 trials [4, 5]. The usage of the macros developed for analysing series of n-of-1 ...

Whether you're looking to become certified, land a job, or increase your skills, you'll benefit from SAS Macro Programming Made Easy, Third Edition. By following Michele Burlew's examples and step-by-step instructions, you'll be able to rapidly perform repetitive programming tasks, to pass information between programming steps more easily, and to make your programming easier to read.

Amazon.com: SAS Macro Programming Made Easy, Third Edition ...
Generally, SAS software processes your SAS program step by step, first scanning it for macro language objects - macro variables referenced as &someName, and macros referenced as %someName. If found, SAS software activates macro processor which resolves and substitutes those macro references according to the macro language syntax before SAS compiles and executes your programming steps.

How to create and use SAS macro functions - SAS Users
In her book SAS Macro Programming Made Easy, Second Edition, Michele Burlew encourages us to take advantage of the SAS Macro Facility as our 'SAS programming assistant.'. She demonstrates how macros can handle many of the SAS programming tasks that you presently spend a lot of time on.

SAS Macro Programming Made Easy, Second Edition: Michele M ...
Argument string has macro or macro variable reference in single quotes. Here comes the interesting part. If the argument to CALL EXECUTE has macro or macro variable references in single quotes, they still will be resolved before the code is pushed out of the DATA step, but not by the SAS macro pre-processor during the DATA step compilation as it was in the case of double quotation marks.

CALL EXECUTE made easy for SAS data-driven programming ...
