The Philosophy Of Social Science

The philosophy of social science is the study of the logic, methods, and foundations of social sciences such as psychology, economics, and political science. Philosophers of social science are concerned with the differences and similarities between the social and the natural sciences, causal relationships between social phenomena, the possible existence of social laws, and the ontological significance of structure and agency.

Philosophy of social science - Wikipedia

Philosophy of social science, branch of philosophy that examines the concepts, methods, and logic of the social sciences. The philosophy of social science is consequently a metatheoretical endeavour—a theory about theories of social life. To achieve their end, philosophers of social science investigate both the practice of the social sciences and the nature of the entities that the social sciences study—namely, human beings themselves.
